

MX TB PLACING CONVEYOR SYSTEM

- Provides the flexibility needed as the final stage of an overland conveyor system.
- Fewer transitions in the system results in less air loss in the concrete.
- Telebelt boom offers an extensive coverage range. It extends to 130-feet (38m) with a 360-degree rotation and can be positioned up to 29-degrees up or 15-degrees down in elevation.
- Tower climbs in 12-foot (3.7m) or 18-foot (5.5m) increments.
